DETAILED ACTION

Allowable Subject Matter

Claims 6-18 and 21-28 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 6, the prior art fails to teach "judging the uplink is in synchronization status when the first pilot BER is smaller than the first synchronization detection threshold value; calculating a second pilot BER of the uplink for a second section when the first pilot BER is not smaller than the first synchronization detection threshold value", as cited in the claim.

Regarding claim 15, the prior fails to teach "logic configured to calculate a second pilot BER of the uplink for a second section when the first pilot BER is not smaller than the first synchronization detection threshold value, and logic configured to compare the second pilot BER calculated for the second section with a second synchronization detection threshold value set for the second section, and wherein the second logic further includes: logic configured to determine the uplink is in synchronization status when the second pilot BER is smaller than the second synchronization detection threshold value", as cited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
